CALL FOR PAPERS

IFAC ADHS 2027 will take place on July 21–23, 2027, at the "Luigi Zordan" Congress Centre of the University of L'Aquila. It brings together researchers and practitioners in control, computer science and applied mathematics. Contributions are invited on modelling, analysis, verification and control of hybrid and cyber-physical systems, including networked control, safety and security, digital twins and learning-based methods. Theoretical results and applications in robotics, autonomous systems, energy, transportation and manufacturing are welcome. Papers with industrial co-authors are particularly encouraged.

L'Aquila, capital of Abruzzo and Italian Capital of Culture 2026, lies at the foot of the Gran Sasso, the highest peak of the Apennines. Its historic centre, reborn after the 2009 earthquake, is home to the Basilica of Santa Maria di Collemaggio, the 99 Cannelle fountain, the Spanish Fortress and the MAXXI museum.
